Dear Author,

Based on the evaluation results from your abstract and fullpaper with title "The Problem of Food Security in the Indonesia Border Area of Nusa Tenggara Timur Province with Timor Leste Country " accepted to be include in **KNE Publisher** please transfer the registration fee of IDR 2.500.000 to the following account:

Bank Name : Bank DBS  
Account Holder : Robbi Rahim  
Account Number : 1704962212  
CODE SWIFT : DBSBIDJA

OR you can transfer through paypal to [https://paypal.me/rrahim18?locale.x=en\\_US](https://paypal.me/rrahim18?locale.x=en_US) and add 6% from total payment for paypal Request (invoice paypal will be send by editor to correspondence email, if you choose this)

We received payment no later than **31 December 2022**, proof of payment you can send back to us by **replying this email message**, and fees that have been **PAID** cannot be **REFUND WITH ANY REASON**. If you not from Indonesia Country and when do payment Bank Transfer, please remember bank charge/paypal fee it will be yours. Thank you very much.

Review:

1. Turnitin check will be provided before submission to publisher
2. Your article must be proofread for English language, and please activate track change in your word article to make sure there is a change in your language. **THIS IS MUST**

Note:

1. **Trade this email as acceptance letter**
2. If the paper is more than 6 pages per IDR 250,000 per page or \$30 per page for non-Indonesian author
3. If the author is more than 5 authors, per author is charged a price of IDR 250,000 and \$30 per page for non-Indonesian author
4. Rejection by the publisher due to plagiarism is the responsibility of the author and the article **WILL NOT PUBLISHED**
5. If article Reject because out of scope by publisher, article will be published in EAI EUDL CCER without additional charge.
6. Editor is **given permission** to **change the title** of the article to match publisher scope, no change in content or references only **TITLE PAPER**.

Best Regards

Editor (Robbi Rahim)

### Abstract

Areas in Nusa Tenggara Timur (NTT) have a high food vulnerability. This study aims to analyze food security in the NTT border region with Timor Leste, thus understanding how to strengthen community food security. The research method used is descriptive to provide a systematic, factual description of the facts, and characteristics of the phenomena investigated. The low performance of farming influences food vulnerability due to the nature of rainfall that does not support agriculture and the little ability of farmer governance and access to innovation and technology. Food security policy strengthens and is needed for border communities and outermost islands. The average distance from the town to the nearest permanent/semi-permanent market is too far. The local community's strategy in dealing with a food vulnerability situation resulting from the hunger risk is to use food that has existed in the past, according to naturally occurring local wisdom. The problem of food security on the border of East Nusa Tenggara needs to be a top priority for Indonesia's development on the border.

**Keywords:** food security, agriculture, border area, Nusa Tenggara Timur, Timor Leste
