The following message is being delivered on behalf of International Journal of Electrical and Computer Engineering (IJECE).

---

Dear Prof/Dr/Mr/Mrs. Dr. Inna Novianty,

We have reached a decision regarding your submission entitled Implementation of Shannon Entropy Analysis on NIR Spectra for Nondestructively Determining of Water Content in Oil Palm Fresh Fruit Bunch" to International Journal of Electrical and Computer Engineering (IJECE)", a Scopus-indexed journal, Scimago Journal Ranking (SJR) Q2.

Our decision is to: REJECT and submit it elsewhere, due to one or more of the below reasons.

1. Ref [20-22] : Please provide the complete information on this source.

Learn more:

<https://ieeauthorcenter.ieee.org/wp-content/uploads/IEEE-Reference-Guide.pdf>

Use a reference manager such as Mendeley to assist you.

2. We do not appreciate a local journal with a local language as a reference. We strongly recommend you replace this reference with another one from an international journal that uses English.

3. Fig 1 : Avoid crowded plots in the figure, use only three or four data sets per image; use well-selected scales. Use clear symbols and data sets that are easy to distinguish.

- The substantial contribution and/or presentation of the paper is not suitable for a Scopus-indexed journal (SJR Q2).
- The figures or tables do not include relevant titles, captions, and descriptions in English.
- The figures or tables are not cited properly in the text.
- The quality of the figures is poor.
- The quality of the references is not suitable.
- Each citation is not written in the order of appearance in the text. Citations and references are not sequential. (All references mentioned in the Reference list are NOT cited in the text, and vice versa.)
- The paper contains a high proportion of self-citations.
- The manuscript has a high similarity rate (high potential plagiarism).
- Authors do not adhere to the style requirements as outlined in the guideline for authors.
- Authors do not comply with requirements for publication within the timeframe, even after extra time, example: Authors do not prepare a final camera-ready paper properly and do not pay the publication fee within the time frame.
- Authors failed to submit revised papers within the allotted time.
- Other reasons.

A good research paper has a clear statement of the problem the paper is addressing, the proposed solution(s), and the results achieved. It describes clearly what has been done before about the problem, and what is new.

Best Regards,  
 Yahya Zakaria

-----  
 IMPORTANT  
 -----

1. Introduction section: explain the context of the study and state the precise objective. An Introduction should contain the following three (3) parts:
  - Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the-art of field the report is about.
  - The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed with reading. Experience shows that for this part a few lines are often sufficient.
  - The Proposed Solution: Now and only now! - Authors may outline the contribution of the manuscript. Here, authors have to make sure readers point out what are the novel aspects of authors' work. Authors should place the paper in the proper context by citing relevant papers. At least 5 references (recent journal articles) are used in this section.

2. Method section: the presentation of the experimental methods should be clear and complete in every detail facilitating reproducibility by other scientists.

3. Results and discussion section: The presentation of results should be simple and straightforward in style. This section reports the most important findings, including results of statistical analyses as appropriate and comparisons to other research results. This is where the author(s) should explain in words what he/she/they discovered in the research. It should be clearly laid out and in a logical sequence. Discussion should be supported with suitable references. You should improve your analysis and present the comparison of your results to those obtained in similar studies. The “result and discussion” section reports the most important findings, including analyzing results as appropriate. It is very important to prove that your manuscript has significant value and is not trivial.

Read our instructions (at:

<http://ijece.iaescore.com/index.php/IJECE/about/editorialPolicies#custom-3>)

carefully and follow the checklist strictly, as any spelling mistakes and errors may be translated into the typeset version. Read and study our published papers at:

The following message is being delivered on behalf of International Journal of Electrical and Computer Engineering (IJECE).

- 
- Paper ID# 31563
  - Strictly adhere to the IJECE Template: <http://iaescore.com/gfa/ijece.docx>
  - We will usually expect a minimum of 25 to 30 references primarily for recent journal articles
  - Please attach your similarity report checking that the result is below 25% uses software such as iThenticate or Turnitin
  - Paper will be rescheduled/cancelled for publication, if the similarity index is more than 25%

Dear Dr. Inna Novianty,

Congratulations! It is my great pleasure to inform you that your paper entitled "Implementation of Shannon Entropy Analysis on NIR Spectra for Nondestructively Determining of Water Content in Oil Palm Fresh Fruit Bunch" has been initially ACCEPTED for publication. Your paper will be published in the International Journal of Electrical and Computer Engineering (IJECE), ISSN 2088-8708, e-ISSN 2722-2578, a Scopus/ScimagoJR indexed journal after fulfilling all requirements for publication. Please always refer to <https://www.scopus.com/sourceid/21100373959> for metrics of this journal. Elsevier (owner of Scopus) provides SJR, SNIP, and CiteScore scores on this website. Please visit <https://www.scimagojr.com/journalsearch.php?q=21100373959&tip=sid> for more information on SJR of this journal.

Your paper will ONLY be published after submitting your final camera paper and fulfilling the requirements below. The presentation of the simulation and/or experimental setup (in the Method section) must be clear and complete in every detail facilitating reproducibility by other scientists. Present a picture of your simulation and/or experimental setup and describe your work clearly. URGENT!! Strictly adhere to the IJECE Template:

<http://iaescore.com/gfa/ijece.docx>, and add biographies of authors as our template (include links to the authors' profiles, do not delete any icons in the template). See <https://ipmuonline.com/about-figure/>

Please prepare your updated paper by doing your best to avoid any delay for publication!

Your paper will be scheduled after your final paper, similarity report and payment evidence reached us!

Please submit your documents below to email: IJECE@iaesjournal.com (in single email) within 6 weeks.

1. Final paper (in MS Word file format)
2. Similarity report (the similarity rate should be checked by using software such as iThenticate or Turnitin, and the result must be below 25%)
3. Payment evidence

When you send in all of the above documents and your final paper follows all of the final instructions, your paper will be judged "fully accepted." It will be the date of your paper's acceptance.

We sincerely appreciate all your hard work and dedication.

Thank you

Best Regards,

Prof. nzw. dr hab. inż. Lech M. Grzesiak

Warsaw University of Technology, Poland

Editor-in-Chief, International Journal of Electrical and Computer Engineering (IJECE)

<http://ijece.iaescore.com>

email: [ijece@iaesjournal.com](mailto:ijece@iaesjournal.com)

-----  
Checklist for finalizing your camera-ready paper for publication (to avoid any delay for publication):

- 1). Please pay attention to the checklist for preparing your FINAL paper for publication:

<https://ijece.iaescore.com/index.php/IJECE/about/editorialPolicies#custom-5>

- 2). The final paper must be presented exactly as follows in the section structure "IMRAD style":

1. INTRODUCTION (I)
2. The Proposed Method/Algorithm/Procedure specifically designed (optional)
3. METHOD (M)
4. RESULTS AND DISCUSSION (RAD)
5. CONCLUSION (C)

See <http://iaescore.com/gfa/ijece.docx>

3). Add biographies of authors as our template (include links to the 4 authors' profiles, do not delete any icons in the template). Provide links for all authors to the 4 icons (Scholar, Scopus, Publons and ORCID). It is mandatory!

4). Please ensure that all references have been cited in your text. Use tools such as EndNote, Mendeley, or Zotero for reference management and formatting, and choose IEEE style. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3], [4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, such as [1], [3], [5]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list.

Examples of in-text citations:

This theory was first put forward in 1970 [9].

Zadeh [10] has argued that ...

Several recent studies [7], [9], [11]-[15] have suggested that...

... end of the line for my research [16].

5). Please present all references as complete as possible and use IEEE style (include information of DOIs, volume, number, pages, etc). If it is available, DOI information is mandatory!

6). Use different PATTERNS for presenting different results in your figures/graphics (instead of different colors only). It is mandatory! See <https://ipmuonline.com/about-figure/>

.....

This journal is an OPEN ACCESS. So, Open access fee is paid by the authors, or on their behalf to support the cost of wide-open access dissemination of research results, to pay deposit to CrossRef in order to each published articles has a Digital Object Identifier (DOI), to manage the various costs associated with handling and editing of the submitted manuscripts, and the Journal management and publication in general.

Each accepted paper will be charged (based on first author and first institution): USD 345. This charge is for the first 8 pages, and if any published manuscript over 8 pages will incur extra charges USD50 per page. Indonesian authors should transfer in IDR instead of USD. (Please refer to <https://www.xe.com> for the exchange rate).

Note! We do not appreciate papers with a single (sole) author. A paper with a single author will never be published in this journal.

The payment should be made by bank transfer (T/T):

-----  
Bank Account name/Beneficiary:

LEMBAGA INSTITUTE OF ADVANCED ENGINEERING AND SCIENCE (IAES)

Bank Name: Bank Mandiri  
Branch Office: Yogyakarta KotaGede  
City: Yogyakarta  
Country : Indonesia  
Bank Account # : 1370011829203  
SWIFT Code: BMRIIDJAXXX

As an alternative, you can pay by using PayPal to email:  
info@iaesjournal.com.  
If you have PayPal account, it's easy for you just send your payment to  
email: info@iaesjournal.com

#### Reviewer Comments

Does the title of the paper accurately reflect the major focus contribution of this paper? Is the abstract an appropriate and adequate digest of the work?:

Yes

If No, Please suggest change of the title as appropriate::

Is the paper clear, concise and well organized & presented?:

Yes

If No, Please suggest change of the paper organizing & presentation as appropriate::

Rate of the contribution strength to the field and scientific quality is represented in this paper?:

Average

Is the paper written in correct English? Is the paper free from obvious errors, misconceptions, or ambiguity?

: No

If No, please note obvious errors, misconceptions, ambiguity, grammatical errors and suggest corrections::

Please check again for typos, grammatical errors, letter cases, and punctuation conventions.

Please mark appropriate scale for the overall grade for this paper? (A score of 7 or above typically provides ground for IAES journal acceptance):

7

Reviewer's comments and suggestions to improve the paper. (If it is not possible, kindly please use separate sheets or a copy of the paper for comments and suggestions for revision. Indicate whether revisions are mandatory or suggested. Please use word processing type format if possible, and then upload or submit via email to ijece@iaesjournal.com)

:

Please see the online system for the comments.
