Dear
Editor International Journal of Futures Studies (ENDLESS)

We have read and used scientific articles published in ENDLESS.
The performance of the ENDLESS was excellent, and the published article helped us conduct research and write scientific reports.

I am Erni Murniarti, representing other authors from Universitas Kristen Indonesia, Jakarta, Indonesia.
We have completed a scientific article entitled "**Empowering Tech-Savvy Youth Education in Society 5.0: Transforming Learning for the Digital Future.**"

We hope this article can be published in the ENDLESS because exciting findings in the scientific report can become new treasures in science, especially in education sciences.
We are willing to go through the review process following ENDLESS standards.

Best Regards,

Erni Murniarti
Universitas Kristen Indonesia, Jakarta, Indonesia

Dear

Erni Murniarti, et al.
Universitas Kristen Indonesia, Jakarta, Indonesia

The ENDLESS Editorial Board has received the team article.
I appreciate the team's interest in ENDLESS.

The team article will be processed according to the publication standards at ENDLESS.
I beg you to be patient while waiting for the notification from the ENDLESS Editorial Board.

Always check email because the correspondence is only via email.

Best Regards,

Dear

Erni Murniarti, et al.
Universitas Kristen Indonesia, Jakarta, Indonesia

Thank you for submitting the manuscript to ENDLESS.

We have completed our evaluation, and the reviewers recommend reconsidering the manuscript following minor revisions. Please resubmit the revised manuscript by October 25th, 2023, or ask whether an alternate date would be acceptable. We invite you to send it back after addressing the comments below.

When revising the manuscript, consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any remarks not addressed. Please also note that the revised submission may need to be reviewed.

To submit a revised manuscript, please log in as an author at this email, and navigate to the "Revision" folder. ENDLESS values team contribution, and I look forward to receiving the revised manuscript.

Editor and reviewer comments:

Reviewer #1:

- Clarity and Focus:** The abstract is well-written and provides a clear overview of the research topic. However, to enhance clarity, consider specifying the key components of innovative education discussed, such as particular learning models or technologies. This will help readers better understand the specifics of your investigation and its implications.
- Methodological Transparency:** While the qualitative approach is mentioned, providing more details on the research methodology, data collection, and analysis techniques will strengthen the paper. A brief explanation of the criteria used to select relevant studies and how their data was integrated could offer more insight into the robustness of your findings.
- In-depth Exploration of Innovative Models:** The paper mentions the positive impact of innovative education, but it would be beneficial to delve deeper into the innovative learning models and technologies employed. Provide examples and discuss their effectiveness in promoting student engagement. This will offer readers a more comprehensive understanding of the practical applications of your findings.
- Nuanced Discussion on Teachers' Role:** While emphasizing the role of teachers is crucial, consider a more nuanced discussion on the challenges they might face in adopting innovative approaches. Address potential barriers, strategies for overcoming them, and the support systems required for teachers to successfully implement innovative education methods.
- Future Research Directions:** To enhance the scholarly contribution, include a section discussing potential avenues for future research. This could involve exploring the long-term effects of innovative education, evaluating its impact on diverse student populations, or investigating the scalability of these approaches. This addition will demonstrate a forward-looking perspective and encourage further exploration in the field.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear
Editor International Journal of Futures Studies (ENDLESS)

Thank you for the patience of the ENDLESS Editorial Board.
We were waiting for the revision of our article.

We have made improvements according to the reviewer's instructions.
We will be happy if there are still points that need to be improved again in the article.

The revised Article is Attached.

Best Regards,

Erni Murniarti

Dear

Erni Murniarti, et al.
Universitas Kristen Indonesia, Jakarta, Indonesia

Thank you for the team's efforts to make improvements to the article.
Based on the reviewers' considerations, the article has, at some point, increased.
However, the team has to improve on a few more points. Hopefully team are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

- Alignment with Society 5.0 Principles:** It would be valuable to explicitly link the findings to the core principles of Society 5.0. Discuss how the identified innovative education strategies align with the societal goals of integration and human-centric technology. Providing this connection will reinforce the relevance of your study within the broader context of societal development.
- Empirical Evidence and Case Studies:** While the paper draws on previous research, consider supplementing the findings with specific empirical evidence or case studies. Real-world examples can strengthen the practical implications of your research and provide readers with concrete instances of successful implementation of innovative education in the context of Society 5.0.
- Addressing Potential Criticisms:** Anticipate potential criticisms or limitations of your study, and address them preemptively in the discussion. Acknowledging any constraints or areas of uncertainty demonstrates a thorough consideration of the research's scope and contributes to the overall transparency and credibility of your work.
- Pedagogical Implications:** Expand on the pedagogical implications of your findings. Discuss how the identified innovative education approaches can be translated into actionable strategies for educators. This discussion could include recommendations for curriculum development, teacher training programs, or policy changes that support the integration of these approaches in educational institutions.
- Enhancing Generalizability:** Consider discussing the generalizability of your findings beyond the specific context of your study. Reflect on how the identified innovative education strategies may be applicable to different educational settings or demographic groups. This broader perspective will enhance the potential impact of your research and attract a wider audience.

Articles that have been revised and please send them back via this email.
