Reviewers' feedback

Reviewer 1:

1 There is no mention of the conference focus on climate change and the built environment in your abstract.

2 High wind speeds are universal and are not limited to tropical areas.

3 You mention 'the lack of theory' - what theory and how has Author dealt with this in this paper?

4 Author says 'the height of a building has a strong correlation with building opening measurements.' Can you name any high rises where the size of the openings reduce as the building heights increase?

5 If there is a strong correlation, why does this fact come about?

Your abstract lacks clarity and a certain logic as to process. This could be improved.

Reviewer 2:

This abstract has the potential to get accepted for presentation and its documentation as a full paper.

Dear Ibu Sally Septania Napitupulu,

We are in the process of finalizing the publication of your article with the IOP-Earth and Environmental Science (EES) - Scopus indexed publication. We have been working closely with this publisher who has asked authors to complete and confirm details of their publications.

As required, we have reformatted your article earlier to meet IOP-EES' paper template. We have attached a copy of the reformatted manuscript of yours and an excel data informing details of your publication. Please kindly check both documents for accuracy and send them back to us upon completion. Please complete your paper with email addresses and keywords in case you have not done so. You are also free to make necessary amendments by keeping it in mind that any change made will not amend the whole format of the document.

Thank you and look forward to receiving both documents back.
