Submission: PNE-2020-1-14 - The Glasgow Outcome Scale-Extended Pediatric Scores of Intracranial Bleeding Patients with Acquired Prothrombin Complex Deficiency Post Craniotomy and Duraplasty

Submitting author: Dr. Robert Sinurat

Attention: Dr. Sinurat

Thank you very much for submitting the above manuscript. Please use the manuscript number as listed above on all correspondence about the manuscript.

The manuscript will now be forwarded to our Editors and reviewers and we shall inform you as soon as a decision has been made by the editorial board.

The progress of your manuscript can be followed from the progress report accessed from your account overview.

Kind regards,

Editorial Office

PNE-2020-1-14 Revise (major revisions)
Yahoo/Email Masuk

Pediatric Neurosurgery <pne@manuscriptmanager.net>

Kepada:robertsinurat@yahoo.com

Jum, 17 Apr 2020 jam 23.54

Manuscript: PNE-2020-1-14 - The Glasgow Outcome Scale-Extended Pediatric Scores
of Intracranial Bleeding Patients with Acquired Prothrombin Complex Deficiency

Post Craniotomy and Duraplasty

Authors: Robert - Sinurat (Corresponding Author)

Date submitted: 2020-01-21

Dear Dr. Sinurat

Thank you very much for submitting the above manuscript to Pediatric Neurosurgery.

Your manuscript has now been evaluated by external reviewers and members of the editorial board. While we certainly find merit in your manuscript, a number of points of criticism were raised and we therefore regret to inform you that your manuscript is not acceptable for publication in its present form. If you feel that you can adequately address the criticisms outlined in the reviewer reports below, we would be willing to reconsider a thoroughly revised version of your manuscript.

When you submit a revised version, please enclose:

1. marked-up version with line numbering and all changes visible (e.g. highlighted

in yellow)

2. clean copy without visible track changes and no line numbering

3. point-by-point reply to all queries raised by the reviewers (page, line,

paragraph, etc.).

4. If the title of your manuscript has changed, please also submit an updated

submission statement form, hand-signed by all authors.

We look forward to receiving the revised version within 3 months and thank you,

again, for submitting your manuscript to Pediatric Neurosurgery.

Sincerely,

Jogi V. Patisapu

pne@karger.com

Pediatric Neurosurgery

Editor-in-Chief comments:

We appreciate the opportunity to consider your work and apologize for the delay in

processing the request.

As per our reviewers' suggestions, this manuscript has value and could benefit from revisions. Kindly consider the suggestions in the spirit intended and we look forward to seeing your revised version soon.

Best regards,

JVP

Reviewer 1 report:

There are two significant indicators related to outcome in management of intracranial hemorrhage in Vitamin K Deficiency Bleeding: reversal of hemostasis function/hemoglobin measures and improvement of GCS after decompression procedures. The author has shown significant reversal of blood measures but has not yet indicate immediate GCS improvement after surgery. It has been well established that post surgical GCS change has predictive values to long-term outcome. It would be interesting to look deeper why patient no. 4 with the worst pre surgical GCS has the worst outcome.

The author indicated that duraplasty might be important factor of decompression in improving outcome. Elaboration on this by comparison to non duraplasty cases would be much more informative, especially in small numbers of case series.

Reviewer 2 report:

The authors report the outcome in five patients with intracranial bleeding

secondary to acquired prothrombin complex deficiency (APCD) submitted to craniotomy with duraplasty.

In introduction, authors should be more clear about the aim of the current study in the last paragraph. Beside this, they could include the background of the literature to the aim of the present study.

In Methods, they should explain better the methodology protocol of the study.

Authors should explain all the steps very clearly, the inclusion and exclusion criteria also are needed.

In discussion, previous data should be compared to the current study.

The English grammar must be reviewed.

PNE-2020-1-14/R1 RESUBMISSION Author to remake manuscript submission (revision)
Yahoo/Email Masuk

Pediatric Neurosurgery <pne@manuscriptmanager.net>

Kepada:robertsinurat@yahoo.com

Kam, 28 Mei 2020 jam 20.19

Manuscript: PNE-2020-1-14/R1 RESUBMISSION - The Glasgow Outcome Scale-Extended Pediatric Scores of Intracranial Bleeding Patients with Acquired Prothrombin Complex Deficiency Post Craniotomy and Duraplasty
Authors: Robert - Sinurat (Corresponding Author)
Date submitted: 2020-05-28

Dear Dr. Sinurat

Thank you for submitting your revised manuscript to Pediatric Neurosurgery.

We noted that the following item(s) do NOT comply to the Guidelines for Authors:

- The title page is missing and should be included in the main manuscript file. The first page of each paper should indicate the title, the authors' names, the institute where the work was conducted, and a short title for use as running head (not more than 80 characters). The exact postal address of the corresponding author complete with street name, house number and postal code must be given at the bottom of the title page. Please also supply phone and fax numbers, as well as e-mail address.
- The abstract is missing in your main manuscript file. The abstract should summarize the main points and reflect the content of an article. It should be written in a clear and simple way and should be STRUCTURED. Please consult the relevant article type sample for more information regarding structuring (<https://www.karger.com/Journal/Guidelines/224273#sec5>).
- The figure legend should be placed after the reference list in your main manuscript file.
- Submission Statement: Please fill in the current place and date (not your birth place and birth date)

We look forward to hearing from you soon.

Sincerely,

Juliane Saettler
Editorial Office

PNE-2020-1-14/R1 RESUBMISSION Revise manuscript (minor revisions)
Yahoo/Email Masuk

Pediatric Neurosurgery <pne@manuscriptmanager.net>

Kepada:robertsinurat@yahoo.com

Sab, 4 Jul 2020 jam 07.52

Manuscript: PNE-2020-1-14/R1 RESUBMISSION - The Glasgow Outcome Scale-Extended Pediatric Scores of Intracranial Bleeding Patients with Acquired Prothrombin Complex Deficiency Post Craniotomy and Duraplasty
Authors: Robert Sinurat (Corresponding Author)
Date submitted: 2020-05-30

Dear Dr. Sinurat

Thank you very much for submitting the above manuscript to Pediatric Neurosurgery.

Your manuscript has now been evaluated by external reviewers and members of the editorial board. A number of points of criticism were raised and these must be addressed before your manuscript can be accepted for publication.

When you submit a revised version, please enclose

1. marked-up version with line numbering and all changes visible (e.g. highlighted in yellow)
2. clean copy without visible track changes and no line numbering
3. point-by-point reply to all queries raised by the reviewers (page, line, paragraph, etc.).
4. If the title of your manuscript has changed, please also submit an updated submission statement form, hand-signed by all authors.

If you have not already done so, please download the submission statement, fill it in and have each co-author sign the form(s).

We look forward to receiving the revised version within 3 months and thank you, again, for submitting your manuscript to Pediatric Neurosurgery.

Sincerely,

Jogi V. Pattisapu

pne@karger.com
Pediatric Neurosurgery

Editor-in-Chief comments:

We appreciate the opportunity to consider your work and appreciate your patience in processing

the request.

As per our reviewers' suggestions, this manuscript has improved nicely from your revisions, and a few minor points were raised for your attention.

Kindly consider the suggestions in the spirit intended and we look forward to seeing your revised version soon.

Best regards,
JVP

Reviewer 1 report:

The author replied to all queries raised by the reviewers. At this moment, only the grammar could be revised.

Reviewer 2 report:

I highly appreciate the author for putting much efforts to respond to and accommodate every suggestion in attempt to improve this article.

This article is to show improved outcomes after surgery in some Vit K Deficiency Bleeding. I would recommend the author to elaborate more on this matter in discussion and put more among few of similar studies (1) to support his argument and conclusions.
