Dr Wilson  
Your paper from August just published  
<https://iopscience.iop.org/article/10.1088/1757-899X/918/1/012064>  
wait for scopus indexation  
If you have any paper on transport, green economics, ecology and want to publish in scopus please let me know

Your wife's paper still under consideration  
I will keep you updated  
have a greatest time  
Denis

Dear dr Wilson  
I just receive a bad news that Indian Journal - Journal of Critical Reviews - where paper of your wife was submitted just removed from SCOPUS (last updates)  
This is my only risk - so I withdrew this paper from publishing and will pay you back your money transferred (400 USD)  
If you want to participate in our upcoming project (about transportation) - as you said in previous email - I will send 300 EURO (355 USD) for you and will back to you 45 USD  
Or if you don't want to submit your paper for now - I will send you back 400 USD  
Sorry for this but you have no reasons to worry  
Your wife can start submission of her paper in other journals for now  
Denis

Fri, Aug 14, 2020 at 10:31 PM

Dear Denis

I have checked the Journal off Critical Review in the 2019 Scopus list. the journal doesnot have SJR and Quartile. It seem we need to look for another journal.

Can you please give a short explanation about the paper of my wife? such as: the time of publication and where it will publish. They need for administration in office.

Sincerely yours

Thank you very much

Wilson Rajagukguk

Illustrations may reduce line thickness when the graphic is imported and reduced in size (scaled down) inside Microsoft Word.

4.4. Colour illustrations  
You are free to use colour illustrations for the online version of Journal of Physics: Conference Series but any print version will only be printed in black and white unless special arrangements have been made with your conference organizer for colour printing. Please check with the conference organizer whether or not this is the case. If any print version will be black and white only, you should check your figure captions carefully and remove any reference to colour in the illustrations and text. In addition, some colour figures will degrade or suffer loss of information when converted to black and white and this should be taken into account when preparing them.

4.5. Positioning figures  
Individual figures should normally be centred but place two figures side-by-side if they will fit comfortably like this as it saves space. Place the figure as close as possible after the point where it is first referenced in the text. If there are a large number of figures it might be necessary to place some before their text caption. Figures should never appear within or after the reference list.

4.6. Figure captions/numbering  
Captions should be below the figure and separated from it by a distance of 6 points—although in some space it is acceptable to put the caption next to the figure. Figures should be numbered sequentially through the text: "Figure 1", "Figure 2" and so forth and should be referenced in the text as: "Figure 1", "Figure 2", ... and not "Fig. 1", "Fig. 2", ...

For captions not placed at the side of the figure, captions should be set to the width of the figure for wider figures, centred across the width of the figure, or for narrow figures with wide captions, slightly extended beyond the width of the figure. The captions should finish with a full stop (period).

4.7. Examples. The following examples show how to format a number of different figure caption combinations. Note that the table borders are shown as broken lines for guidance only.

Wider figure/short caption

Figure 1. Table with short caption to point to text

Article information

### Abstract

Information and communication technology (ICT) has been a part of global life and also has a positive impact on human welfare. ICT involves activity, hardware, and electronic software that execute processing, transmission, and displaying information. This study aims to investigate the impacts of ICT on economic welfare. The data used were from the World Development Indicators of the World Bank for 82 countries during 2009 through 2017. The dependent variable was GDP per capita and the independent variables were ICT indicators, measured by the number of automated teller machines (ATMs), fixed broadband subscriptions, and mobile cellular subscriptions. The data were analyzed employing a random effects regression model for panel data. The results of study indicate that the number of ATMs, fixed broadband subscriptions, and mobile cellular subscriptions had significant effects on GDP per capita statistically. Higher economic welfare was associated with higher number of ATMs, fixed broadband subscriptions, and mobile cellular subscriptions.
