Dear Faradiba Faradiba:

We have reached a decision regarding your submission to the International Journal of Progressive Sciences and Technologies, "Study of Elements Released from Various Cooking Utensil After Heating on Cooking Utensil of Aluminum, Stainless Steel, Titanium-coated Stainless Steel and Teflon and Their Potential Health Hazards".

Our decision is to: **Accept the paper.**

In order to schedule your paper for publication, pay the publication fee by logging in your IJPSAT account and click on "PAY TO PUBLISH"

N.B: if you want to pay with **Western Union**, Our **Western Union** information is as follows:

Last name: **JAOUJAL**
First name: **ACHRAF**
Country: **MOROCCO**
Address: **3 Rue Ennajm, Touabel Soufla, 93045 TETOUAN.**

Phone: **+212666659988**

Please tell me the MTCN after payment.

If you have any questions, please contact me.

Please accept our regards and thanks for contributing to IJPSAT .

IJPSAT Co-Editor

Dear Co-Editor

I have transferred APC via western union.
At the bank where I transferred, I was informed that for countries MOROCCO can only be in dirhams (MAD). So I converted from IDR 450,000 (Indonesia) to MAD 253 (Morocco), estimated to be worth around 30 USD (according to the guide).

The MTCN number: 163-683-0854 (complete information is in the attachment). Please confirm when the funds have been received.

Thank you for your attention.

Regards,

Dear Faradiba

I'd like to inform you that your paper was published in the IJPSAT October Issue (Vol. 23, No. 1).

You can check the publication at:

<https://ijpsat.ijsh-journals.org/index.php/ijpsat/issue/view/47>

and you can download the paper from this link:

<https://ijpsat.ijsh-journals.org/index.php/ijpsat/article/download/2306/1332>

Please accept our regards and thanks for contributing to IJPSAT Journal.

Co-Editor.

Sat, Nov 7, 2020 at 10:08 AM

Dear Houda

Thank you, the link provided can be accessed.

However, I have a confusion in the conclusion, there is still Indonesian.

If possible, can it still be replaced at the conclusion?

The following should be the script at the conclusion:

Conclusion

The composition of the element raw material alloy of cooking utensils studied consists of elements Al, Si, Ca, Fe, Cr, Ni, Ti, Mn, S, Cl and Mo. The elements released from the raw material of the cooking utensil and enter into the salt solution which can be detected consist of the elements Al, Si, Ca, Fe, Cr, Ni, Ti, Mn, Mg and Na. The aluminum cooking utensil released the highest levels of Al, Ni, Mn and Ti elements among the cookware studied. The Fe and Cr elements released with the highest levels occurred in raw material alloy titanium coated stainless steel cooking utensil. Previous studies revealed that exposure of metals such as Fe, Si, Ni and Cr to human target cells had the potential to cause health hazards in humans.
