Editor and Reviewer comments:

Reviewer #1:

1. This article is very actual and interesting, but the author needs to show the novelty of this research. I think the novelty claim is still not that strong.
2. Literature review needs to be strengthened to discuss problems.
3. The author must explain the method used in this study in detail until the data analysis.
4. The results and discussion need to be compared with previous findings so that the novelty of this study is clearer.
5. References need to be reproduced with the latest journals relevant to the research theme.

I hope you can make improvements as soon as possible, and send the revised article again via this email.

Dear

Chontina Siahaan
Universitas Kristen Indonesia

Thank you for your efforts to make improvements to your article.

Based on Reviewers' considerations, the article has, at some point, increased.

However, you have to improve on a few more points again. Hopefully, you are willing to do it.

Please follow the following more revision instructions:

#Reviewer 2:

1. Abstract must be made in a solid, consisting of all essential things related to the written topic, not repeating the conclusions of the research you have done.
2. The discussion section must be deepened, the author must relate the topics discussed with previous references. In this section the discussion is still weak because the references cited do not support it.
3. Conclusions should be concise and clearly explain the core findings of the study.
4. References need to be added to the latest relevant journal articles in the last 5 years.

Articles that have been revised and please send it back via this email.
