Kepada: editor@psychologyandeducation.net

Dear: Editor Psychology and Education

I am Hotmaulina Sihotang, lecturer at Universitas Kristen Indonesia

I have an interest in the field of science published by your journal, and now I have research that is in line with the "focus and scope" of your journal.

I have completed a scientific article entitled "Gender Equality Awareness of Indonesian Students in Time of Covid-19 Pandemic".

I hope this article can be published in the Psychology and Education, because there are interesting findings in the scientific article that can become new treasures in science.

Best Regards,  
ThanksHotmaulina Sihotang

Dear  
Hotmaulina Sihotang  
Universitas Kristen Indonesia

The Psychology and Education Editorial Board has reviewed your article, the research topic is very interesting, but we decided that your article could not be accepted immediately. You must improve your article on several points.

I am sure you are willing to make this improvement because your scientific articles must meet Psychology and Education standards.

Please correct your article according to the instructions from the Psychology and Education Reviewers.

#### FIRST REVIEWER

1. This article is very up-to-date and interesting, but in my opinion the novelty is not visible in the introduction, because the references you have quoted are still minimal and have not been compared with your research, so the novelty is not visible
2. Literature review needs to be strengthened with current references to discuss the problem you are researching
3. The research method must be described in detail so that each process is carried out
4. Results and discussion need to be compared with previous findings so that the novelty of the researcher's findings is clearer
5. References need to be reproduced with the latest journals that are relevant to the theme of your research

#### SECOND REVIEWER

1. Authors should indicate why this research is important or urgent to do, for example in relation to a literature vacuum
2. Your abstract is too long and wordy, the abstract must be concise and interesting that shows the problem, purpose, method and the novelty of the research results.
3. The research method you use must be more detailed so that it is easy to understand
4. The discussion is not in depth, so I have not seen new findings from this study with the existing literature
5. References need to be added to the latest relevant journal articles for at least the last 5 years.

I hope you can make improvements as soon as possible, and send the revised article again via this email.

Best Regards,

--

Kepada: Hotmaulina Sihotang &lt;hotmaulina.sihotang@uki.ac.id&gt;

Dear

Hotmaulina Sihotang  
Universitas Kristen Indonesia

Based on Reviewers' considerations, the article has, at some point, increased. However, you have to improve on a few more points. Hopefully, you are willing to do it.

Please follow the following revision instructions:

### FIRST REVIEWER

1. Abstract must be made in a solid, consisting of all essential things related to the written topic, not repeating the conclusions of the research you have done.
2. The discussion section must be deepened, the author must relate the topics discussed with previous references. In this section the discussion is still weak because the references cited do not support it.
3. Conclusions have not focused on the research objectives. Briefly outline your conclusions to answer the research objectives

### SECOND REVIEWER

1. The conclusions you have made are too verbose and do not represent the overall result.
2. Use the latest references and should mostly be in the form of journal articles published in reputable journals
3. The author must explain what are the limitations of this research.

Articles that have been revised and please send it back via this email.

Best Regards,
