Editor and Reviewer comments:

Reviewer #1:

1. Show why this research is important or urgent to do in relation to the blankness of literature.
2. Abstract is too long and wordy, the abstract must be concise and interesting that shows the problems, objectives, methods and novelty of the research results.
3. The author must map similar studies beforehand to show the novelty of this research.
4. The discussion is not in depth, so deepen the discussion with the findings of previous researchers.
5. References need to be added to the latest relevant journal articles in the last 5 years..

I hope you can make improvements as soon as possible, and send the revised article again via this email.
