Jenis-jenis bahasa figuratif yang ditemukan dari 30 sampel acak tersebut adalah metafora, hiperbola, eufemisme, ironi, sinekdoke. Prosedur terjemahan yang paling banyak digunakan penerjemah adalah terjemahan literal. This study aims to analyze the types of figurative language in a collection of poems and the procedures applied in translating them. The methodology used for this research is qualitative descriptive. The data analyzed in this research were taken from a collection of poems by Pablo Neruda which was translated into English by W.S. Merwin as the source language. For the target language, the researcher took the data from the Indonesian translation by Saut Situmorang. The researcher found 5 out of 7 types of figurative language, based on 30 randomly selected samples. The types of figurative language found from the 30 random samples are metaphor, hyperbole, euphemism, irony, and synecdoche. The translation procedure dominantly used by the translator is literal translation. Literal translation is a procedure that conveys meaning to the target language reader literally while transferring the original form word for word. Literal translation is applied to the translation of 12 figurative languages which are 7 hyperboles, 4 metaphors, and 1 irony.

Keywords: translation, figurative language, translation procedures.
