Reviewers comments:

To Author: Despite the topic and methodology is aligned to the topic of our journal, I suggest to clarify the research objective of the paper including a sentence in the introduction. As for the literature review section, I suggest to clarify as a sentence that “The analysis of the literature was carried out according to the approach proposed by Centobelli et al. (2020) and Rasool et al. (2021)”. These are the references of these papers that provide theoretical justification of the literature review process: Centobelli et al. (2021) Blockchain technology for bridging trust, traceability and transparency in circular supply chain, Information and Management, 103508; Rasool et al. (2021). Measurement of consumer awareness of food waste: construct development with a confirmatory factor analysis. British Food Journal. Finally, I would suggest expanding the concluding section stressing limitations of the study.

To Author: I recommend to improve the theoretical justification according to previous literature review contributions and clarify the practical implications.
