

CHAPTER V

CONCLUSION AND SUGGESTION

This chapter consists of two parts. The first is about the conclusion, and the second is some suggestions.

A. Conclusion

Based on the results of research and discussion whose data were collected using a questionnaire to assess the variables of vocabulary development in speech practice, it can be concluded that vocabulary with speech exercises got positive results to be applied in 7th grade of junior high school. The results of the frequency show that students have positive results with the results of "Average" for learning English to develop vocabulary in using speech exercises. Some students also feel neutral because some students do not mind because they have been trained to practice speaking in the course.

B. Suggestion

The method of developing vocabulary in the practice of using practice speech is one of the skills in language English sometimes needed in teaching vocabulary that must be done by a teacher. Because in teaching and learning activities, teachers often exercise speech or speaking in class. So that with the speech or speaking in a class method, it is hoped that in learning activities in class students can be active and the learning process is more fun so that the learning objectives are to develop vocabulary and confidence to speak and become accustomed. but especially for 7th grade junior high school unimportant for using practice speech to develop vocabulary because in this situation elementary school does not learn English. so difficult for using on practice speech to develop vocabulary in learning language English.
