

CHAPTER V

CONCLUTION AND SUGGESTION

A. Conclusion

Based on qualitative as well as quantitative data has been fulfilled by the researcher in order to find out the impact of teaching vocabulary using Berlitz method in Happy Holy Kids Cinere Preschool and has shown improvement based on the result from the test. Yet, researcher's conclusion as: a) The students' vocabulary mastery by using Berlitz method had improved. It could be showed from the result of pre-test, post-test from cycle I and cycle II. Which the mean of pre-test was 46.43 points and cycle I was 64.29 and the final result as the post-test of cycle II was 78.93 points; b) Observation and interview sheet result showed that the students of Happy Holy Kids Cinere Preshcool were more enthusiastic and responded during teaching learning process.

B. Suggestion

Researcher hope that this study will be useful for present and future time. Thus, researcher would like to give some suggestion as follow:

1. To teacher

Teacher should create an alternative way on how to make learning and teaching process of English language attractive, especially young learners are very easy

to adopt language as early as possible. Teacher should also able to develop teaching materials that suits with students' level.

2. To students

Students should practice more in using target language. There are lots of new method that can make the learning process more fun and students need to be more focus to follow the new and vary methods. They are should also more active in the class and also creative to find out the best way to learn the target language. In other words, students should not be lazy to learn new vocabularies and remind it.

3. To other researcher

To other researcher who have interest on conducting research to improve vocabulary by using Berlitz method it is recommended to have it in same or other discipline.
