Draft Paper for IOSR-JEN JUL 2022.edited.docx;

Board of Editor

IOSR Journal of Engineering

I would like to submit the manuscript entitled **Using Bio-Pore Infiltration Hole to Reduce Flooding in Densely Population Communities of Jakarta and Surrounding Area** by Lolom Evalita Hutabarat and Irene Vista Simanjuntak to be considered for publication as a research paper (case study) in the [International Organization of Scientific and Research Journal of Engineering \(IOSR JEN\)](#)

Stagnant rainwater is a common environmental problem during the rainy season. As a result, some watersheds need to reduce standing water, reducing environmental damage and residential unrest. In Jakarta and densely populated urban areas, space for water infiltration is minimal. A bio-pore infiltration hole is an alternative solution that acts as an eco-drainage system. The study is being carried out to investigate the effectiveness of bio pore infiltration holes in reducing flooding. We believe these results will be of interest to readers of your journal.

We declare that this manuscript is original, has not been published before, and is not currently being considered for publication elsewhere.

We hope you find our manuscript suitable for publication and look forward to hearing from you.

Sincerely,

**Lolom Evalita Hutabarat**
