**Dear****Editor Nternational Journal of Sciences: Basic and Applied Research (IJSBAR)**

We have read and used scientific articles published in IJSBAR.

The performance of the IJSBAR was excellent, and the published article helped us conduct research and write scientific reports.

I am Nadeak Berndetha, representing other authors from Universitas Kristen Indonesia.

We have completed a scientific article entitled "***The Description of Medical Students' Interest and Achievement on Anatomy at Faculty of Medicine Universitas Kristen Indonesia.***"

We hope this article can be published in the IJSBAR because exciting findings in the scientific report can become new treasures in science, especially in education sciences.

We are willing to go through the review process following IJSBAR standards.

Best Regards,

Nadeak Berndetha

**Dear**

Nadeak Berndetha, et al.  
Universitas Kristen Indonesia

Thank you for submitting the manuscript to IJSBAR.

We have completed our evaluation, and the reviewers recommend reconsidering the manuscript following minor revisions. Please resubmit the revised manuscript by February 2<sup>th</sup>, 2018, or ask whether an alternate date would be acceptable. We invite you to send it back after addressing the comments below.

When revising the manuscript, consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any remarks not addressed. Please also note that the revised submission may need to be reviewed.

To submit a revised manuscript, please log in as an author at this email, and navigate to the "Revision" folder. IJSBAR values team contribution, and I look forward to receiving the revised manuscript.

Editor and reviewer comments:

Reviewer #1:

1. **Clarity of Research Objectives:** The research objectives are not explicitly stated in the abstract. It would be helpful to clearly outline the specific goals of the study to guide readers in understanding the focus and purpose of the research.
2. **Methodology Rigor:** The methodology section lacks details regarding the survey design and qualitative approach. Provide more information on the sampling technique, data collection instruments, and how the qualitative data were analyzed to enhance the transparency and replicability of the study.
3. **Questionnaire Validation:** Ensure the validity of the questionnaire by providing information on its development and validation process. Establishing the reliability and validity of the instruments is crucial for the robustness of the findings.
4. **Analysis Techniques Explanation:** Elaborate on the specific techniques used for Likert Scale analysis and how the descriptive techniques for interviews were applied. A clearer explanation will assist readers and future researchers in replicating and understanding the analytical processes.
5. **In-depth Exploration of Low Achievement:** The abstract mentions low learning achievement in anatomy, but it would be valuable to delve deeper into the factors contributing to this, whether they are curriculum-related, teaching methods, or other external factors. Provide more insights to enhance the study's comprehensiveness.

I hope you can make improvements as soon as possible and send the revised article again via this email.

Dear

**Editor Nternational Journal of Sciences: Basic and Applied Research (IJSBAR)**

Thank you for the patience of the IJSBAR Editorial Board. We were waiting for the revision of our article.

We have made improvements according to the reviewer's instructions. We will be happy if there are still points that need to be improved again in the article.  
The revised Article is Attached.

Best Regards,

Nadeak Berndetha  
Universitas Kristen Indonesia

Dear

Nadeak Berndetha, et al.  
Universitas Kristen Indonesia

Thank you for the team's efforts to make improvements to the article.  
Based on the reviewers' considerations, the article has, at some point, increased.  
However, the team has to improve on a few more points. Hopefully team are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

1. Contextualization of Results: The abstract briefly touches on the percentage of students with high interest in anatomy, but it lacks a broader context. Comparing these findings with existing literature or national/international trends would strengthen the relevance and significance of the results.
2. Implications for Medical Education: Discuss the practical implications of the research findings for medical education. How can the insights gained from this study inform teaching strategies or curriculum development in anatomy courses? This would add value to the research in a broader educational context.
3. Discussion on Causation: The abstract concludes that student failure is not caused by their interest. Provide a more nuanced discussion on the relationship between interest and achievement, exploring potential contributing factors to low achievement that may not be directly related to interest.
4. Temporal Aspect: The abstract mentions the respondents from 2015-2017, but there's no clarification on whether this timeframe is relevant to the study. If there have been significant changes in the curriculum or educational system during this period, it should be acknowledged and discussed.
5. Language and Grammar: Carefully proofread the abstract for grammatical errors and ensure consistency in language use. A polished presentation enhances the professionalism of the article and aids in conveying the intended message effectively.

Articles that have been revised and please send them back via this email.

Dear Author  
**Nadeak Berndetha & Naibaho Lamhot**

Warm Greetings!

**ACCEPTANCE LETTER**

It's a great pleasure to inform you that, after the peer review process, the ***"The Description of Medical Students' Interest and Achievement on Anatomy at Faculty of Medicine Universitas Kristen Indonesia"*** team article has been accepted for publication in the IJSBAR Regular Issue 2023. Please make a payment publication fee.

Thank you for submitting the paper to this journal. We hope to receive it in the future too.
