**Dear**  
**Editor International Journal of Academic Research and Development (IJAR)**

I have read and used scientific articles published in IJAR.  
The performance of the IJAR was excellent, and the published article helped me conduct research and write scientific reports.

I am Lamhot Naibaho, from Christian University of Indonesia, Jakarta, Indonesia.  
I have completed a scientific article entitled "**Exploring Digital Technology Integration in Learning Innovation.**"

I hope this article can be published in the IJAR because exciting findings in the scientific report can become new treasures in science, especially in education sciences.  
I am willing to go through the review process following IJAR standards.

Best Regards,

Lamhot Naibaho  
Christian University of Indonesia, Jakarta, Indonesia

Dear

Lamhot Naibaho  
Christian University of Indonesia, Jakarta, Indonesia

The IJAR Editorial Board has received the article.  
I appreciate the interest in IJAR.

The article will be processed according to the publication standards at IJAR.  
I beg you to be patient while waiting for the notification from the IJAR Editorial Board.

Always check email because the correspondence is only via email.

Best Regards,

**Dear**

Lamhot Naibaho  
Christian University of Indonesia, Jakarta, Indonesia

Thank you for submitting the manuscript to IJARD.

I have completed our evaluation, and the reviewers recommend reconsidering the manuscript following minor revisions. Please resubmit the revised manuscript by October 30<sup>th</sup>, 2022, or ask whether an alternate date would be acceptable. We invite you to send it back after addressing the comments below.

When revising the manuscript, consider carefully all issues mentioned in the reviewers' comments: outline every change made in response to their comments and provide suitable explanations for any remarks not addressed. Please also note that the revised submission may need to be reviewed.

To submit a revised manuscript, please log in as an author at this email, and navigate to the "Revision" folder. IJARD values team contribution, and I look forward to receiving the revised manuscript.

Editor and reviewer comments:

Reviewer #1:

- **Clarity of Purpose:** The abstract introduces the study's aim to explore digital technology integration in learning innovation. However, it would be beneficial to clearly articulate the specific objectives or research questions that guide the investigation. A more explicit statement of what the study aims to achieve will enhance the reader's understanding of the research focus.
- **Transition and Flow:** The abstract mentions the conventional teacher-student interaction and the impact on verbalism, then shifts to technological advancements. To improve coherence, consider refining the transition between these ideas. Clearly connecting how the traditional learning model necessitates innovation and how technology addresses these challenges would provide a smoother flow for the reader.
- **In-depth Explanation of Learning Technologies:** While the abstract mentions various learning technologies such as computer-based learning, teleconference, and e-learning, it could benefit from a more detailed exploration of these technologies. Providing examples or brief explanations of how each technology contributes to learning innovation would enhance the reader's comprehension.
- **Integration of Scholarly Perspectives:** Expand the abstract by integrating relevant scholarly perspectives or theoretical frameworks that support the exploration of digital technology integration in learning innovation. This addition would provide a theoretical foundation for the study and demonstrate a thorough understanding of existing literature in the field.
- **Emphasis on Research Impact:** The abstract touches upon the benefits of technology integration in learning, such as stimulating active student learning and promoting creativity. However, it could be strengthened by emphasizing the potential broader impact of these benefits on the overall educational landscape. How might the findings contribute to educational theory, policy, or practice? Clarifying the broader implications would enhance the significance of the study.

I hope you can make improvements as soon as possible and send the revised article again via this email.

29 Oktober 2022 18.35

Dear

**Editor International Journal of Academic Research and Development (IJARD)**

Thank you for the patience of the IJARD Editorial Board.  
I was waiting for the revision of my article.

I have made improvements according to the reviewer's instructions.  
I will be happy if there are still points that need to be improved again in the article.

The revised Article is Attached.

Best Regards,

Lamhot Naibaho  
Christian University of Indonesia, Jakarta, Indonesia

Dear

Lamhot Naibaho  
Christian University of Indonesia, Jakarta, Indonesia

Thank you for the efforts to make improvements to the article.  
Based on the reviewers' considerations, the article has, at some point, increased.  
However, article has to improve on a few more points. Hopefully you are willing to do it.

Please follow the following revision instructions:

#Reviewer 2:

- **Rigorous Methodology:** The abstract lacks details about the methodology employed in the study. Providing a brief overview of the research design, data collection methods, and analysis techniques would add depth to the abstract. Readers are likely to be interested in the rigor of the research process, and this information will contribute to the overall credibility of the study.
- **Alignment of Keywords:** The selected keywords—technology, learning, integration—are crucial for search engine optimization and reader comprehension. However, consider ensuring that these keywords are explicitly addressed within the abstract itself. This alignment would reinforce the relevance of the study to the specified keywords, making it more discoverable and identifiable to researchers in the field.
- **Temporal Context:** The abstract mentions that the conventional teacher-student interaction has been ongoing for a long time, but it doesn't provide a clear temporal context. Including a brief historical overview or citing relevant studies that highlight the evolution of traditional learning methods to the present digital era would enhance the reader's understanding of the context in which the research is situated.
- **Integration of Counterarguments:** To enhance the scholarly discourse, consider briefly acknowledging potential counterarguments or challenges associated with the integration of digital technology in learning. Addressing potential criticisms or limitations demonstrates a nuanced understanding of the topic and adds depth to the research, fostering a more comprehensive discussion.
- **Citation of Technological Innovations:** When discussing technological advancements, providing specific examples of innovative tools or platforms within each category (e.g., computer-based learning, teleconference, e-learning) would enrich the abstract. This approach would not only clarify the scope of digital technology discussed but also offer readers tangible references for further exploration and understanding.

Articles that have been revised and please send them back via this email.

7 November 2022 09.32

Dear Author  
**Lamhot Naibaho**

Warm Greetings!

**ACCEPTANCE LETTER**

It's a great pleasure to inform you that, after the peer review process, the **"Exploring Digital Technology Integration in Learning Innovation"** article has been **Accepted** for publication in the IJARD Regular Issue 2022. Please make a payment publication fee.

Thank you for submitting the paper to this journal. We hope to receive it in the future too.
